health & safety training

Are you and your managers aware of your legal responsibilities for ensuring that all employees are sufficiently trained in health and safety?

Do your induction procedures for new staff include general health and safety awareness training?

Are you aware that specified training is required by law in certain areas? For example, certain chemicals, use of abrasive wheels, first aid, site equipment such as overhead cranes and fork lift trucks etc?

health and safety training

The answer to the above questions, and many more, can be found through one of our many health and safety training programmes or courses.

We can be as flexible as your require, delivering them in lecture style or as fully interactive workshops. These can be on your premises or off site and at times to suit you. Breakfast sessions, half day, full day or evenings are all possible.

IOSH managing safely®

As an approved IOSH training provider, we can deliver this market-leading Health & Safety course to help you improve the safety awareness culture in your organisation & see your productivity increase.

iosh Approved training provider 4654
